Additional Details

- When using the Overlay Makeups, Apply one of the Overlay Weights first, then apply one of the Overlay Styles or Colors
- About DForce hair:
 - The DForce hair's shape depends on the pose of the character and simulation sitting (there is no style morph for it). I made 3 solutions for the simulation. In general, you can get satisfactory simulation results by loading preset Solution 1 or 2, if not, you can try simulation Solution 3. Solution 3 can be based on 1 or 2 or other settings.
 - Load your pose (If posed already, skip)
 - Load "Zero Upper Body"
 - Right-click on "Posing" tab and click "Memorize-Memorize Figure Pose"
 - Load your pose again
 - Run simulation. Check if only the upper body is moving in the simulation. If not, redo step 2 to step 5
 - The solution 3 is not always better than 1 or 2. If you want to go back to use solution 1 or 2, just right-click on "Posing" tab and click "Zero Figure Pose", then click "Memorize-Memorize Figure Pose"
 - Tips: You can right-click on "Zero Upper Body", then click "Create a Custom Action" It will then be convenient for you to find it next time (on top menu-Scripts)
