Product Information

- Required Products: *None*

Add water to your scenes with “JW 3d water” for Daz Studio Iray.

This pack contains 46 props simulating different shapes of water, like filling with water different base shapes (square, rectangle, circle and oval), splashing, oceans, rain, water on a window and much more.

To expand the use of the props, this pack includes a PDF User Guide with some advices to change correctly some parameters to get new effects in your photos, like changing the distortion of the image under the water and its opacity, changing correctly the color of the object to simulate different fluid (like blood, beer or whatever you want) and much more (check promotional image).

Props use Iray settings, which come for free with Daz Studio and don't require a .jpg or .png base image to look as they are shown in the promotional images.
