

Ultimate Eyes for Genesis 8

Product Name:	Ultimate Eyes for Genesis 8
Product ID:	58543
Published Artist(s):	PhilW
Created By:	N/A
Release Date:	2019-02-04

Product Information

- Required Products: *None*

It is said that the eyes are the window of the soul - and they are certainly the focal point of the face, with good eyes able to make or break an image. Ultimate Eyes gives you a sure way to achieve

realistic eyes with impact for your Genesis 8 characters, both male and female.

While the many colors available are a key feature, the core of Ultimate Eyes is a set of morphs covering the cornea, the iris and pupil and the lacrimal. The cornea is reshaped to be much more physically accurate, resulting in realistic reflections and to catch lights which are essential to achieving realistic eyes. The iris is made subtly concave to catch the light (a technique much used by leading animation studios) and the lacrimal is made very realistic with a combination of a custom morph, maps, and shaders. And because these use the regular eye model, they can be combined with any other eye morphs that you already have (such as the Eyes Pupils Slit morph).

A preset is included to use the morphs with any character's existing textures, but you are going to want to explore the 24 realistic and varied eye colors included, each of which is unique and derived from photographic sources for maximum realism. Presets are included to darken the iris in three levels to provide many more possible shades. I also had fun creating 12 fantasy and sci-fi textures which can really enhance any robotic, alien or fantasy characters. There is a choice of 6 maps for the sclera, ranging from white through to very bloodshot (great for vampire characters!).

If you want to make your portraits as realistic as possible, you can use Ultimate Eyes with confidence to achieve extra impact in your images.

Product Notes

Installation Packages

Below is a list of the installation package types provided by this product. The name of each package contains a [Package Qualifier \(WIP\)](#), which is used as a key to indicate something about the contents of that package.

- 1 Core ¹⁾

Not all installation packages provide files that are displayed to the user within the interface of an application. The packages listed below, do. The application(s), and the location(s) within each application, are shown below.
