DIGITAL ART LIVE

Product Name:	Daz Studio Content Library
Product ID:	59761
Published Artist(s):	Digital Art Live
Created By:	N/A
Release Date:	2019-04-03

Product Information

- Required Products: *None*

Sonja McClung, IceDragonArt, has had a long journey in getting her Daz Studio Content Library into a structure that works for her!

After losing her original Daz Studio Content Library to a hard disk melt-down and then going through a period of mourning, Sonja decided to use this disaster as an opportunity and completely restructured her content setup. It took many months of planning and effort to get everything into place, but it was very well worth it!

Now Sonja creates her artwork as much as 80% faster, because finding content is now a snap. Inserting new content into her system is just as fast.

In this interactive workshop, Sonja talks about:

- A disaster making her a master.
- Her category folder system and why it works for her.
- Content management tips.
- Managing Daz 3D Store Content.
- Managing 3rd Party Content.
- Backing up and restoring your Library.
- The Daz Install Manager (DIM) and the Content Manager.
- Software used in this tutorial : Daz Studio

About Sonja, IceDragonArt:

- "I've loved fantasy for as long as I can remember. Fairies, Elves, Dwarves, Centaurs and of course Dragons. I love the possibility of the impossible that fantasy brings, the wide open opportunity to get lost in a world that is far different than ours, full of magic and wonder, feats of heroism that defy the odds and best of all, good always conquers evil. What's not to love?"
- "I've always loved to draw as well. I can't remember a time that I didn't have a crayon (or a pencil, or a paintbrush) in my grubby little hands. I took a long hiatus from drawing when I was raising my kids (best art project ever!) and started to really get back into art in the last 6 years or so. I picked up PhotoShop and immediately fell in love with being able to draw and paint digitally. A couple of years later, I found Daz Studio, a 3D art application and was totally hooked!"

Product Notes

Installation Packages

Below is a list of the installation package types provided by this product. The name of each package contains a [Package Qualifier \(WIP\)](#), which is used as a key to indicate something about the contents of that package.

- 1 Core ¹⁾

[] = *Optional, depending on target application(s)*

Not all installation packages provide files that are displayed to the user within the interface of an application. The packages listed below, do. The application(s), and the location(s) within each application, are shown below.
