## Additional Details

- Product works relatively well as conforming and dForce
- Using more than 30 frames (at least 45) will help many simulations
- In many poses, current frame and animation, simulating with Start Bones from Memorized Pose is better to use
- Some shapes may work with auto follow
- Product will not load or work correctly without the figure in the scene
- Product is made to work with smoothing on
- Materials have been optimized for Iray and may not look the same in 3Delight
- Some poses may cause collision so tweaking the pose or the figure's limbs may be necessary
- Unexpected numeric member: version will appear in Log file. This means that it was created in a different version and in no way does it affect the product
- When changing poses, do not forget to use the Clear Animation/Clear Figure Pose in the Parameter tab under Genesis 8 Female before adding another pose

- Use of too many adjustment dials at once may cause distortion
- Clear simulation from a scene before using a new pose and simulation
- Some adjustment dials may be set higher. Please be aware that using them to limits may cause distortion
