Product Information

- Required Products: *None*

The Easy Environments series for Daz Studio and Poser combines high-res 360° Skysphere/HDRI backgrounds with terrain geometry to place your characters on.

ExoPlanet V is a volcanic planet. Beautiful but dangerous lava-streams break up the surface (both on the Skysphere/HDRI and the geometry), moons hang above a fiery red horizon. The file formats are native.DUF for Daz Studio 3Delight and Iray, and .PP2 for Poser.

Lighting is included for all versions (Iray through the HDR environment, 3Delight parented to the skysphere, Poser as separate preloads).
