Product Name:	<a href="#">Powerful Poses : How to Create Dynamic Pose Sets</a>
Product ID:	60761
Published Artist(s):	<a href="#">Digital Art Live</a> , <a href="#">Quixotry</a>
Created By:	N/A
Release Date:	2019-05-14

## Product Information

- Required Products: *None*

With so many joints to control in a 3D character, producing your own successful poses can feel quite daunting. Poses can make or break an image since with one glance we can see if something in the posture does not look natural!

To tackle posing challenges, it is very worth gaining a thorough understanding of the controls available in DAZ Studio as well as absorbing some background on anatomy and body language. Mary Wright (Quixotry) shares her valuable experience of creating many successful pose sets sold in the DAZ 3D store. In this workshop learn ideas for generating a good posing workflow, overcome trials with posing the more difficult parts of the body, examine posing case studies and study how to set up, save and package poses to share with other artists.

Content includes:-

Using the Posing dials and Pose Control dials in the parameters pane

All about the PowerPose

Where to start the process in posing a character

Considering the centre of gravity

Top advice for checking that feet/paws/hooves touch the ground properly

Posing the hand successfully

Diving deeper into posing expressions

Using reference photos in setting up poses

Case study 1 : The minotaur

Showing quality connections ? posing characters to interact

A word on body language

Case study 2 : Telling a story with poses ? character interaction

Saving full poses

Saving partial poses

Saving expressions

How to set up and save hierarchical poses for use with props or multiple figures

Packaging poses to share

About the presenter : Mary Wright

Mary Wright is a published artist at DAZ 3D known as Quixotry.

She's an accomplished DAZ Studio portrait-maker, with a fantasy edge and has developed a series of characters and pose sets sold in her DAZ 3D store.

She grew up surrounded by beautiful paintings. Her father, Thomas Baker, is a master oil painter

specializing in portraiture. It was his talent, teaching, and encouragement that led her to begin developing her own artistic abilities. This, combined with help from several other talented family members, led to the taking up of a great many hobbies which include woodwork, clay sculpting, papercraft, beading, and writing: all practiced with great enthusiasm and varying degrees of success. Mary discovered Daz Studio while looking for an affordable program that would allow her to learn about the world of 3D art. Recognizing it as a useful tool for figure reference, illustration, and book cover creation, she added it to her workflow and found that pairing 3D renders with postwork in Photoshop opened up a world of exciting artistic possibilities. On top of being a digital artist, Mary is a freelance editor, voracious reader, and lover of the written word. She has run her own business, Quills, Nibs, and Keyboards Editing & Design Services, from home since 2014. It started out as a simple editing business and later expanded to include graphic design elements as she branched out into book cover creation with the help of Daz Studio.

She lives in New Mexico with her husband Brandon and their cat, Bagheera.

## Product Notes

### Installation Packages

Below is a list of the installation package types provided by this product. The name of each package contains a [Package Qualifier \(WIP\)](#), which is used as a key to indicate something about the contents of that package.

- 1 Core

[ ] = *Optional, depending on target application(s)*

Not all installation packages provide files that are displayed to the user within the interface of an application. The packages listed below, do. The application(s), and the location(s) within each application, are shown below.

### Additional Details

Below is a list of files provided by the [Powerful Poses : How to Create Dynamic Pose Sets](#) product.
