## ■ Introduction

The Proaim Seagull Support is a brilliant device that allows operators to attach Proaim Arm and Vest to motorized gimbal stabilizers including the DJI Ronin® and Freefly MōVI®. The system features two steadycam-style Arms, along with multi-functional ergonomic Vest. Adapting your motorized gimbal with an arm and vest turns your gimbal into a body-worn stabilizer, meaning the operating load is taken off the arms of the operator allowing for longer durations of stable handheld video shooting. Proaim Seagull Support with smart new features further meets the needs of today's camera operating professionals.
